SUMMARY

Enthusiastic Python Backend Developer with hands-on experience in building web applications using Django and Django REST Framework. Skilled in developing REST APIs, authentication systems, and database-driven applications through practical projects. Possesses basic working knowledge of HTML, CSS, and Bootstrap for frontend integration, with a primary focus on backend development, problem-solving, and building scalable web solutions.

SKILLS

Backend: Python, Django, Django REST Framework
Database & Frontend (Basic): MySQL, HTML, CSS, Bootstrap
Core Concepts & Tools: REST APIs, CRUD Operations, Django ORM, Authentication, GitHub, VS Code
Languages: Gujarati (Fluent), Hindi (Fluent), English (Working Proficiency)

PROJECTS

Society Management System | Python, Django, HTML, CSS, Bootstrap, MySQL

- Developed a web-based system with user authentication and admin management.
- Created modules for maintenance and event payments.
- Built a complaint management system with status tracking.
- Used Django ORM for database operations and designed a responsive UI.

CRUD & REST API Project | Django, Django REST Framework, MySQL

- Built a CRUD application to add, update, view, and delete records.
- Developed REST APIs using Django REST Framework and worked with serializers.
